BR-5000 / BR-6000 / BR-7000

The most popular and versatile of parking stackers.

Designed to accommodate a vast array of vehicles, including SUVs, sedans, and sports cars, the BR-5000/6000/7000 offers a minimum footprint and can be installed independent, or in a ganged column design to capitalize on the available space. The BR-5000/6000/7000 operates in both indoor and outdoor environments and is specifically designed to accommodate the needs of real estate developers, architects, engineers, automotive dealers, and commercial parking operators.

- Perfect solution for both indoor and outdoor parking
- Highly adaptable, customizable and cost-efficient car stackers
- Ganged column design allows multiple installations in minimum space
- Can be configured for drive-through and tandem parking applications
- Lifting capacity 5060lbs. / 5950lbs. / 7054lbs.
- Car height on ground up to 80.7 (2050mm)
- Usable platform width up to 82.7 (2100mm)
- Driven by hydraulic cylinder & lifting chain
- Galvanized corrugated platform

Pit Parking Lifts

The pit parking system offers maximized installation dimension flexibility for 2 to 4 vehicles.

The system offers great flexibility for access and comfort. The lift provides independent access to each car through the utilization of a pit. The ease of operation makes it ideal solutions for Developers, multi-family projects and hotel parking.

- Independent access to each vehicle
- Ideal solution for low ceiling height parking
- Offers solid corrugated platform
- Offers multiple dimensions and customization flexibility

Puzzle Parking Lifts

The most versatile mechanical parking solution.

The parking space selected is moved to the desired position by automatic control system and the parking spaces can be shifted vertically or horizontally. The system mobilizes the existing space by using it the best possible way. They can be built up from 2 levels to 7 levels. The unique hydraulic drive system makes platforms lifted 2 or 3 times faster, to shorten the waiting time for parking and retrieve. The Puzzle can also be used both indoors and outdoors.

- Design build systems available in many variations and custom designs
- You can build up from 2 to 7 levels of configuration
- Independent access to each vehicle with no pit required
- The unique system design, shortens the waiting time for parking and retrieval
